INNOVATION YOU SEEK,
GIFTS YOU TRUST

A COLLECTION MADE TO BE REMEMBERED

The best promotional gifts do more than display a logo – they carry a story people will remember. This catalogue is built around products that make brands part of everyday life: on the desk, on the road and at home – so a company name does not just appear, it sticks.

This edition contains nearly 2500 items, selected for bold design, smart function and real impact. The range brings a wide choice of sustainable and recycled materials, picked with more conscious choices than ever before. Only the most memorable, innovative products made it into these pages, giving every promotion a clear and confident edge.

All of this is now presented in a redesigned, streamlined catalogue. Clear sections, simple navigation and inspiring visuals make it easy to build strong, consistent stories – and turn every gift into a powerful statement of your brand.

550 PRINTING TECHNOLOGIES

PRINTING OPTIONS

The way a logo is applied can be just as important as the product itself. Colours, finishes and placement all influence how clearly a story comes across. Our printing options are purposed to turn designs into sharp, durable and attractive branding – from discreet tone-on-tone effects to bold, eye-catching decorations that make sure a brand is noticed and remembered.

We offer over 20 different printing technologies, covering classic paint-based methods, modern digital techniques and a range of speciality solutions. Full-colour processes allow vivid, detailed artwork, while several 360° rotary technologies make it possible to wrap messages all around bottles, mugs and other cylindrical items. With this variety, it becomes easy to match each product with the right printing option and create a finish that truly supports the strength of the brand.

VARIABLE NAME PRINTING

Make it personal with our new variable name printing option! This feature allows you to customise each product with an individual name – ideal for bottles, mugs and many more everyday favourites. It's a simple way to turn branded items into something that feels personally chosen: gifts that people are more likely to keep in their daily routine.

Name printing is applicable to the following technologies:

UV LED printing
Rotary UV LED printing
Engraving
Rotary Engraving
Sublimation printing
Rotary Sublimation printing
Digital printing
Digital Transfer printing
Custom BE CREATIVE items

Please note that variable name printing pricing differs from our regular printing's pricing.

GO GREEN

GO GREEN is a range of promotional gifts made from recycled or sustainable materials, designed to lessen environmental impact while remaining practical and budget-friendly. This collection supports companies that wish to act responsibly and demonstrate environmental awareness in a clear, visible way. As building blocks of eco-focused campaigns, GO GREEN products can strengthen brand perception, underline corporate social responsibility and make it easier to communicate concrete sustainability goals. Each item is carefully selected for the benefits it brings to production and everyday use, helping to reduce waste and encourage better habits.

RECYCLED MATERIALS

The recycled range gives existing resources a second life. Clear and coloured bottles are turned into recycled PET textiles and drinkware, used plastics become recycled PP or ABS housings, and recovered metals such as aluminium and stainless steel reappear in robust, long-lasting items. Recycled paper, glass, PU leather and even special materials like EcoAllene or recycled milk carton add further options. Choosing these products supports waste reduction and circular material use, while keeping familiar shapes and functions that recipients use every day.

SUSTAINABLE MATERIALS

Sustainable products are made out of materials that come from renewable or responsibly managed sources. Items made with bamboo, wood, cork, hemp, jute, organic cotton, wheat straw or bamboo-fibre plastic are designed for long-term, everyday use. These components help conserve natural resources, lower the overall footprint of the product and create a warm, tactile appearance that fits well with environmentally aware campaigns. Natural textures and colour tones also work well with subtle engravings or single-colour prints, making these items a natural choice for clean, elegant branding.

be Creative

BE CREATIVE is a special range of products designed for full-surface customisation. Many items can be printed edge-to-edge with vivid, full-colour, photo-quality artwork, so the entire product becomes a branding area. Using advanced technologies such as digital printing, sublimation and UV LED printing, you can create bold patterns, gradients and detailed graphics that are easy to match to any campaign or visual identity. If you can imagine the design, BE CREATIVE can turn it into a gift.

EU

MADE IN EUROPE

BE CREATIVE products are manufactured or assembled, and then printed in Central-European facilities, ensuring stable quality, reliable lead times and low minimum order quantities. Many components are kept in stock and only printed or assembled once an order is placed, which allows flexible combinations of colours and designs without long waiting periods. This European production base helps you plan campaigns with confidence and offer customised gifts that feel both unique and dependable.

CREAPACK CUSTOM PACKAGING

CreaPack is a custom packaging solution that turns printed products into complete gifts. Matching boxes and sleeves can be fully printed in full colour, so the packaging carries the same design language as the item inside. This creates a consistent look from the first glance and adds an extra, highly visible branding surface to every order.

BOX AND SLEEVE OPTIONS

The range currently includes white and kraft paper boxes for a wide variety of products, plus matching sleeves for selected items where the original packaging remains visible or is part of the presentation. For premium or fragile gifts, we offer corrugated cardboard boxes that gives extra protection without losing print impact. CreaPack options are continuously expanding, giving you more and more ways to tailor the packaging to each campaign.

STANDALONE CREABOX GIFT BOXES

Besides product-specific CreaPack options, standalone CreaBox gift boxes are available for general packing needs such as welcome kits, mailings or multi-item gift sets. These boxes can be ordered independently, allowing you to combine several promotional and traditional gifts into one coordinated package with full-surface, full-colour branding.

Prices include the outside full-colour printing of the boxes. Minimum order quantity is 50 pieces, and all boxes are delivered flat-packed for easy storage and efficient transport.

PRINTING TECHNOLOGIES

Choosing the best gift - from our wide product collection - for your promotional needs is only half of the success equation. The appearance of your logo or message carries equal importance. In order to ensure the realisation of your brand image, we provide various printing technologies, ranging from traditional methods to state of the art digital technologies.

The following guide aims to give you a brief overview of our labelling techniques and to help you pick the best for your selected item.

- Printing technology.

P PAD PRINTING

Pad printing is the most popular, traditional ink-based labelling method. This technology uses a silicone pad to transfer ink onto an item with fine details and high accuracy, applicable to a wide range of materials. Pad printing allows labelling curved surfaces.

S SCREEN PRINTING

Screen printing is a traditional ink-based labelling process, for flat or flattenable products, with high durability and colour accuracy. During the screen printing process ink is directly pressed on the product's surface through a gauze, then fixed with heat treatment.

RS ROTARY SCREEN PRINTING

Rotary screen printing is a special kind of screen printing for labelling bottles. The cylindrical screen printing machine rotates the product parallel with the gauze, resulting in continuous prints throughout the surface of the product.

T TRANSFER PRINTING

Transfer printing is based on traditional screen printing, however, instead of being directly screen printed onto an item, the design is printed onto transfer paper, then applied with a heat press. Transfer printing is applicable to a wide range of products and holds several advantages over screen printing.

DT DIGITAL TRANSFER

Digital transfer printing is a modern, full-colour alternative to traditional transfer printing. The design is printed in photo quality onto transfer paper with a special digital printer, then applied to the product with a heat press. Our digital transfer technology carries no limitation in size or shape of imprints.

SU SUBLIMATION PRINTING

Sublimation printing is a full-colour, digital labelling technique with photo quality. Designs are printed with special ink on a transfer paper, then heat-pressed onto the product's surface. Sublimation is only applicable to light coloured polyester and sublimation coated products.

OP INKJET OVERPRINTING

Inkjet overprinting is used to imprint flat surfaces in full-colour with a special high-speed inkjet printer. As inkjet overprinting does not utilise white inks, imprint colours may be effected by the base colour of the product. Inkjet overprinting is applicable to porous materials, such as paper, natural bamboo and wood.

UV UV LED PRINTING

UV LED printing is a full-colour, digital labelling process utilising UV-cured inks. Logos are directly printed on the product's surface in high-resolution, resulting in instant photo quality imprints.

RUV ROTARY UV LED PRINTING

Rotary UV LED printing is a digital, full-colour labelling process to create photo quality imprints directly on the surface of cylindrical and conical items, allowing a large imprint wrapping the item. Rotary UV LED imprints are coated with transparent varnish for an exquisite look and extra durability.

C CERAMIC PRINTING

Ceramic printing is used to label mugs, glasses and certain metal items using special ceramic paints fired at high temperature. The label is applied to the product similarly to transfer printing, then fired in a furnace.

WPC CERAMIC WHITE PRINITING

Ceramic white printing is a special full colour printing technology for white ceramic products, which is based on ceramic printing.

O DEBOSSING

Debossing is an elegant process that changes the surface of the material that has been debossed, through forming a 3D impression. This impression is achieved by pressing a specially-made die onto the product's surface.

E ENGRAVING

Engraving utilises lasers to mark a product's surface. The surface of the product practically burns in the process to develop the logo. Even small logos can be printed very accurately. Engraving is applicable to metal, wooden, glass and certain plastic products.

RE RAINBOW ENGRAVING

Rainbow engraving is a special laser engraving technology, utilising different wavelength laser beams to achieve coloured imprints on metal items, without the use of inks or chemicals.

ER ROTARY ENGRAVING

Rotary engraving utilises lasers to mark the surface of cylindrical products. With the help of a special rotary device the engraved product is rotated during the printing process, allowing a large imprint wrapping the item. Rotary engraving is applicable to metal, wooden, bamboo, glass and certain ceramic products.

DO EPOXY DOMING

Epoxy doming is a unique printing technology, using full-colour printed stickers covered with 2 component resin. As a result, the treated sticker will have a 3-dimensional look. Epoxy domed logos can be produced in custom shapes and are resistant to UV rays.

DG DIGITAL PRINTING

Digital printing is used to imprint paper products and paper inserts in photo quality. Paper inserts can be produced in various sizes and shapes.

VF VISION FILM PRINTING

Vision Film printing is a special printing technique for labelling sunglasses lenses. During the labelling process, a digitally printed and perforated film is applied enabling a high degree of customisation.

VS VINYL STICKER

Vinyl stickers are digitally printed full-colour, self-adhesive stickers applicable to various, otherwise hard to print, products. Vinyl sticker logos can be produced in various sizes and shapes.

BR EMBROIDERY

Embroidery is used to label textile products, resulting in durable and high-quality imprints, by an automatic embroidery machine which applies thread through needle stitches. Pantone matching is not achievable, due to limited thread colours.

EP PEN ROTARY ENGRAVING

Pen rotary engraving uses a precision-controlled cutting tool to mechanically engrave markings into the surface of pens. The process removes a thin layer of material to create clean, permanent text or logos with sharp edges and consistent depth.

N* VARIABLE NAME PRINTING

Variable name printing is an additional service applied across several printing technologies that enables each item to be individually customised. It allows different names, serial numbers, or data to be printed on each product with consistent quality and precision.
